

CaterSense - 04 Controller - Speed Control and Gas Pressure Proving

CaterSense 04 unit is one of our multi-function controllers which can be used in any catering application. It's patented fan power monitor circuit and selectable gas pressure proving enables the unit to start / stop control two fans, speed control them via a range of inbuilt and external speed controllers and even control the supply air temperature via a heater battery to meet BS6173:2001 and DW172.

This product has a number of available inputs which can be used to perform different functions, such as CO2 level monitoring / control with our carbon dioxide sensors.

Model Type	Model	Description
	CaterSense - 04	Controller - GPP + optional single fan

Technical Data		
Power supply	240Vac	50Hz (L,N,& E)
Number of sensor channels	Two	
Current rating of monitor	1 to 8Amp	(inbuilt) 1 to 100Amp external
Voltage range of fans	Single phase	(240Vac) or three phase 415Vac
Gas valve output	240Vac	(L,N & E)
Fire alarm input	Volt-free	to open on alarm
Remote knock-off	Volt-free	to open on activation

Typical Application - Extract Fan Canopy

Wiring Diagram

The CaterSense system has two sets of terminals all mounted along the top edge of the main PCB circuit board.

Terminals 1 to 22 are the smaller terminals (1.5 mm² cable) and are used for the sensors, inter-locking devices, remote speed and on/off control.

Terminals 23 to 34 are the larger terminals (4 mm² cable) and are for the power connections for the fans, gas valve and power supply to the unit.

The terminals are of the rising clamp type protection.

Fitting Instructions

The **CaterSense - 04** unit has six (6) mounting holes which can be used (as shown)

Note: Ensure that the enclosure is mounted on a clean and level surface away from the direct cooking area or surfaces.

Ancillary Products

Remote Knock-off Buttons

- RKPB-01 Knock-off
- RKPB-02 Key
- RKPB-03 Key + Shroud

Remote Sensors

CS-GPS-01

CS-RCT-01

CS-RCT-02

Gas Valves

GV Valves
1/2" to 2-1/2" BSP
