

Combined CO₂ & Temperature Transmitter: CS-F2000-TSMx

Catersense® - combined CO₂ and temperature transmitter is used in conjunction with the Catersense Range to the control of natural ventilation applications to control the temperature and CO₂ levels within a given space.

The transmitter has 2 x 0~10v analogue outputs which are linear in respect of the range of detection.

Two ranges of the CO₂ sensor are available , 0~2000ppm and 0~5000ppm and both have a ABC Logic self calibration algorithm
